Mosby, 2007. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: Focusing on what psychiatric nurses actually do in everyday practice, this full-color text covers all of the most common disorders and treatments. A balanced nursing-medical approach includes a strong emphasis on the nursing process, DSM-IV-TR diagnostic criteria, and interdisciplinary interventions. This book offers an approach that is clear, straightforward, and holistic to boost confidence in managing clients and to help students prepare for success on the NCLEX examination. Clinical Alert boxes address issues critical to the safety or well-being of the client. Client and Family Teaching Guidelines boxes discuss the issues confronting families when a member suffers from mental illness. Nursing Assessment Questions boxes include questions that should be asked in the assessment of a particular disorder. Case studies depict effective nursing care strategies and encourage critical thinking. Nursing Care Plans provide guidelines for care, with each plan including a brief case study, followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. Clinical Symptoms boxes make it easy for students to apply content to the real world. DSM-IV-TR Criteria boxes list categories of mental disorders and the criteria for diagnosing them. Additional...
