Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Arithmetic of Pharmacy This work is intended to cover all of the calculations required by the practical pharmacist. While the work will be useful to those in actual practice, its greatest value will be to students of pharmacy, whether in college or in the store. The use of higher mathematical terms has been carefully avoided, and the analyses made as simple as possible that they may better serve the needs of those who have been deprived of a liberal education. For the same reason, some subjects have been treated in a manner that may seem unnecessarily simple, but these may be omitted by the more advanced students. The atomic and molecular weights used in this book are obtained from the table of International Atomic Weights published by the Journal of the American Chemical Society, Vol. XXV, p. 1, 1903.  $H = 1$ . The specific gravity of substance is usually given when necessary for calculation of problems. Otherwise, the student is referred to the Pharmacopoeia, 8th Dec. Revision, upon which all the problems are based. I am indebted to W. H. Blome, M.S., and to Don. S. Stevens, A.B., for assistance in verifying results.
