### ***Reviews***

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

VDM Verlag Dr. Müller E.K. Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - This book is timely because of the increasing popularity of minimally invasive and cost effective methods to ablate solid tumors. Medical image guided ablation using thermal energy sources such as radio-frequency, microwave, laser, high-intensity focused ultrasound, and cryogenics have received much recent attention as minimally invasive strategies for the ablation of tumors. This text describes novel and practical image registration methods and mathematical models to predict the cellular response from magnetic resonance (MR) images, which guide and monitor therapy. Many clinical and animal model studies seeking to characterize the biological response to thermal ablations, localized drug release, and other MRI-guided therapies would benefit from this book. This text should be especially useful for medical, engineering, applied mathematics, physics, and computer science students, researchers, and clinicians. 100 pp. Englisch.
