

Axiomatizing Qualitative Process Theory (Classic Reprint) (Paperback)

Filesize: 8.14 MB

Reviews

Comprehensive information for publication enthusiasts. I could possibly comprehend every little thing using this composed e pdf. You can expect to like the way the article writer create this pdf.

To get **Axiomatizing Qualitative Process Theory (Classic Reprint) (Paperback)** eBook, you should refer to the link below and save the file or gain access to additional information which might be in conjunction with AXIOMATIZING QUALITATIVE PROCESS THEORY (CLASSIC REPRINT) (PAPERBACK) ebook.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Axiomatizing Qualitative Process Theory We show that the type of reasoning performed by Forbus [1985] Qualitative Process (QP) program can be justified in a first-order theory that models time and other measure spaces as real-valued quantities. We consider the QP analysis of a can of water with a safety valve being heated over a flame. We exhibit a first-order theory for the microworld involved in this example, and we prove the correctness of the first two transitions in the envisionment graph. We discuss the possibility of deriving the closure conditions in the theory via non-monotonic inference. One way to increase confidence in a reasoning program is to show that the conclusions that it draws correspond to valid inferences within some easily intelligible logical theory. Such a correspondence has been shown for many of the best known physical reasoning programs. The calculations performed by QSIM [Kuipers, 86] correspond to theorems in real analysis, under a natural interpretation; [Duchier, 91] exhibits full first-order proofs of these. Likewise the reasoning in NEWTON [de Kleer, 77] and ENVISION [de Kleer and Brown, 85] can be shown to be valid for a simple physical theory, easily formalized in first-order logic, in which time and other physical parameters are viewed as real-valued quantities. (See, for example, [Rayner, 91], [Davis, 90, chap. 7].) However, no adequate logical analysis has hitherto been given for the Qualitative Process (QP) program [Forbus, 85]. In QP, processes can come into and out of existence, and the topological structure of the physical system may change over time. Hence, the problem of finding an appropriate formulation of the necessary closed-world assumptions on processes and influences seemed daunting. In...
