Unprecedented Choices

By Audrey R. Chapman

Augsburg Fortress Publishing. Paperback. Book Condition: New. Paperback. 272 pages. Dimensions: 8.9in. x 5.9in. x 0.7in. With vast new scientific and technological powers, we face unprecedented choices for which traditional ethics provide little direct guidance. What role can the religious community play in addressing the ethical and theological issues that even science now acknowledges as urgent? Chapman's work forges a method for integrating ethical reasoning with scientific data, focusing on four issues -- cloning, genetic engineering, patenting of life, and environmental alteration. For each, she reviews the work of religious thinkers, assesses the roles of the religious community, considers relevant confessional differences, determines how traditional theological and ethical concepts can be clarified, reformulated, and operationalized to meet the questions, and finally she formulates helpful methodological options. She calls for a scientifically informed religious ethics built dialogically from concepts in both science and theology. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

It is an amazing publication which I actually have at any time go through. It really is written in easy words and phrases rather than hard to understand. It's been developed in an extremely easy way which is merely following I finished reading through this pdf in which actually changed me, affect the way I think.

-- **Garry Lind**

Certainly, this is actually the greatest job by any publisher. It is really simplistic but shocks within the 50 % of the pdf. I am just happy to tell you that this is the very best ebook I have read in my own lifestyle and may be the greatest ebook for actually.
