RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Reston, Va. : U. S. Geological Survey, 2008. OCLC Number: (OCoLC)191957277 Subject: Pavements -- Earthquake effects -- California -- Santa Clara Valley (Santa Clara County). Excerpt: . . 120 circle radius 100 meter 40080 per number 60 damage, 40 of Concentration 20 0 100 350 600 850 1100 1350 1600 1850 2100 Distance across feature, meters Figure 9. Circles are values from the density map taken along a cross-section. Black line is a gaussian curve ( mean 1100, standard deviation 250 ) fit to the data. Note that the gaussian curve fits the data well to two standard deviations, indicating damage in this area forms a cluster, and little effect is seen beyond two standard deviations ( grey vertical lines ). 2 within the town of Los Gatos and a radius of about 500 m. There are 310 points within this area, and they seem to be attributable exclusively to the cluster, with little effect seen outside the models radius. The 310 points within a 500 m radius of the center of the modeled cluster were removed, generating a dataset referred to for...
