Dover Publications. Paperback. Book Condition: New. Paperback. 160 pages. Dimensions: 12.1in. x 9.2in. x 0.5in. A prolific author of books on wildlife, the great naturalist Ernest Thompson Seton was also an accomplished illustrator. Noting a dearth of general zoological anatomies for artists, he took it upon himself to create one. This volume is the result of his efforts. In it, he provides a definitive artists-eye view of the exterior anatomy of animals, helping readers depict surface features such as hair or fur, as well as basic body and facial structures. Chapters cover a number of domesticated and wild species: the anatomy, size, and proportion of the lion, tiger, leopard, and other members of the cat family; bears (including the grizzly, European brown, American black, and the polar bear); as well as the camel, Indian elephant, and the caribou. Additional sections consider the horse in motion, the gallop of a dog, and bird feathering. One of the most widely consulted books on the subject, *Art Anatomy of Animals* will be a valuable addition to the libraries of both instructors and students of art. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
